

## Intelligent cutting-edge analytics

Introducing our latest service,  
**impANALYTICS**: AI business-driven intelligence  
with no hardware required.

Our **cutting-edge dashboard service** is a powerful tool that revolutionises the way you manage and monitor your half-hourly meter data, providing affordable machine learning-driven analytics **from £250\*** per year.

With our intuitive and **user-friendly interface**, you gain full control and visibility into your energy, power, cost and carbon emissions in real time.

**impAnalytics** service automatically collects your billing meter half-hourly data, and you benefit from the impact of AI-driven analytics. This software solution gives you the answers to your big energy questions.

### impANALYTICS key features

- **Optimal sizing for solar PV generation and battery storage**
- **Identify and value energy flexibility opportunities**
- **Energy decarbonisation real-time emissions reporting**
- **AI forecasting of ROI cost and carbon savings from investment**
- **Identifies ideal tariff types for imports/exports**
- **Specifies the optimal connection capacity**
- **Reporting for: Energy (MWh) / Power (kW) / Cost (£GBP) / CO2 (Kg)**
- **Multi-site meter management for bill reconciliation and overall consumption**

\* Per fiscal meter, October 2023.

→ This service is designed for all business energy users who are half-hourly metered. By creating a digital twin and running complex simulations of market conditions, weather patterns and network activity over your operational data, you can have confidence in the always measurable and verifiable data-driven analytics and reporting results.

Our **impCloud dashboard** provides an overview of your energy consumption allowing you to track usage patterns, identify inefficiencies, and make **data-driven decisions** to optimise energy efficiency, and take control of costs and decarbonisation.

You can **stay informed** about your energy savings and flexibility earnings, as the dashboard presents clear and actionable insights.

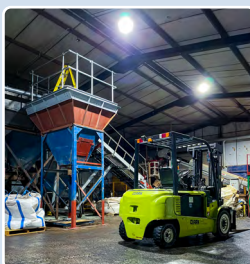

With secure and reliable cloud-based infrastructure, you can **access the dashboard anytime**, anywhere, using any device with an internet connection.

You can also **collaborate seamlessly** with your team, share reports, and monitor multiple locations from a centralised platform.

## Suitable for:

- Farming & Agriculture
- Manufacturing & Industrial
- Retail, Leisure & Hospitality
- Food & Drink
- Education & Public Sector
- Historic & Heritage Properties

## → Why choose impAnalytics

Our impCloud dashboard unlocks new levels of efficiency, cost savings, and sustainability for your business. Take control of your energy destiny and propel your organisation towards a greener and more prosperous future.
